**Open questions:**

8.	What did you like particularly in this subject?	2	Open question	22.22
8.1	Steven's energy was extra ordinary, I really like the way he pushed us. Subject gave me more than I was expecting in a such little time. All questions were answered. I learned different solutions than I can find on my own, which is important.			
8.2	The lecturer is so pateint. I like it a lot. Also, this subject is very useful.

- 9.1 We had problems with labs. In the beginning too many students for the lab and in the middle the Maya License stopped working. Steven did a great job finding alternatives for both cases thanks.
- 9.2 I would be much more appreciated if the teaching was delivered in a slower pace and/or detail steps were provided with each subject materials because I usually could not follow what were being demonstrated.
- 9.3 The only problem is that it is a time-consuming subject. most people have to stay up whole night for several days to do animations. If it can be devided to a 2-semester subject, it would be very good for students managing time on other subjects and learn animation more intensely.
- 9.4 Need more practical exercise in the lab before submitting assignment
