**Open questions:**

8.	What did you like particularly in this subject?	5	Open question	100
----	-------------------------------------------------	---	---------------	-----

- 8.1 The practical work
- 8.2 steven was an excellent teacher and often stayed back after class to help students individually. he was often physically active in class to help explain animation concepts and movements. overall very rewarding class.
- 8.3 Helped me improve my animation skills

<b>Scale</b>	SD - strongly disagree	D - disagree	N - neutral	A - agree	SA - strongly agree

- |           |                                                                                                                                                 |          |                      |
|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------|----------|----------------------|
| 8.4       | The way animation was given importance more than just teaching Maya software was a great experience. Not many school does that.                 |          |                      |
| 8.5       | I liked the content and the amount of things covered. and the constructive feedback was always well explained and helpful.                      |          |                      |
| <b>9.</b> | <b>Please suggest any improvements that could be made to this subject.</b>                                                                      | <b>4</b> | <b>Open question</b> |
| 9.1       | only improvement would be for steven to slow down a bit to cater to students speeds at working out tutorials.                                   |          |                      |
| 9.2       | Just the machines that we were working on..created few problems while the classes go on..                                                       |          |                      |
| 9.3       | Putting all the master of animation student in one batch and the rest, who have taken the as elective, in another batch would be of great help. |          |                      |
| 9.4       | hmmm...well...it was extremely fast at times, but then there's a lot to cover...so...i'm not to sure about that one.                            |          |                      |
