Open questions:

11.	What did you like particularly in this subject?	3	Open question	50
11.1	Fantastic subject. It would be great if the subject could continue from "Introduction to Game Design" to an even more advanced subject			
11.2	The variety of assignment types were interesting and fun to do			
11.3	I enjoyed the "hands-on" experience of designing games from scratch. This was a far more enjoyable and thought provoking way of presenting the subject and allowed application of the ideas presented in the text-book (which was a very good choice of text). Playtesting the games also allowed a full encompass of all events in a game designers environment and was intriguing to see how other people had interpreted the question.			
12.	Please suggest any improvements that could be made to this subject.	2	Open question	33.33
12.1	I would have liked more time to work on the computer game assignment. The other 2 games assignments were good fun too but would have preferred to finish them both before the holiday week giving us much more time to produce a higher quality computer game			
12.2	I would have liked some tutorials providing the basics of game maker, although I recognise time constraints may have restricted these maybe even outside of class time. I'm sure plenty of people would have attended to participate in these. The online tutorials were good, but some of the later online tutorials are a bit vague in how to complete some actions and this wasted some time just trying to get the tutorial to work, when I could have been working on my final project.
