

CSS 132 A  
Computer Programming For Engineers I  
Course type: Face-to-Face

Evaluation Delivery: Online  
Evaluation Form: A  
Responses: 14/19 (74% very high)

Taught by: Yusuf Pisan  
Instructor Evaluated: Yusuf Pisan-Other

**Overall Summative Rating** represents the combined responses of students to the four global summative items and is presented to provide an overall index of the class's quality:

<b>Median</b> <b>4.3</b> (0=lowest; 5=highest)	<b>College Decile</b> <b>5</b> (0=lowest; 9=highest)
--	--

**Challenge and Engagement Index (CEI)** combines student responses to several IASystem items relating to how academically challenging students found the course to be and how engaged they were:

<b>CEI: 5.6</b> (1=lowest; 7=highest)
--

### SUMMATIVE ITEMS

	N	Excellent (5)	Very Good (4)	Good (3)	Fair (2)	Poor (1)	Very Poor (0)	Median	DECILE RANK	
									Inst	College
The course as a whole was:	14	43%	7%	29%	14%		7%	3.5	2	3
The course content was:	14	50%	7%	14%	21%		7%	4.5	6	7
The instructor's contribution to the course was:	14	50%	14%	14%	14%	7%		4.5	4	5
The instructor's effectiveness in teaching the subject matter was:	14	50%	7%	14%	21%		7%	4.5	5	6

### STUDENT ENGAGEMENT

	N	Much Higher (7)	(6)	(5)	Average (4)	(3)	(2)	Much Lower (1)	Median	DECILE RANK	
										Inst	College
<b>Relative to other college courses you have taken:</b>											
Do you expect your grade in this course to be:	13	15%	31%	8%	38%	8%			5.0	4	5
The intellectual challenge presented was:	13	23%	54%	15%	8%				6.0	8	7
The amount of effort you put into this course was:	13	23%	38%	23%	15%				5.8	5	5
The amount of effort to succeed in this course was:	13	31%	38%	15%	15%				6.0	7	7
Your involvement in course (doing assignments, attending classes, etc.) was:	13	23%	46%	8%	23%				5.9	5	5

On average, how many hours per week have you spent on this course, including attending classes, doing readings, reviewing notes, writing papers and any other course related work?

**Class median: 9.5 Hours per credit: 1.9 (N=12)**

Under 2	2-3	4-5	6-7	8-9	10-11	12-13	14-15	16-17	18-19	20-21	22 or more
	8%		17%	25%	8%	17%	17%				8%

From the total average hours above, how many do you consider were valuable in advancing your education?

**Class median: 8.8 Hours per credit: 1.8 (N=12)**

Under 2	2-3	4-5	6-7	8-9	10-11	12-13	14-15	16-17	18-19	20-21	22 or more
8%	8%	8%	8%	25%	25%			8%			8%

What grade do you expect in this course?

**Class median: 3.5 (N=12)**

A (3.9-4.0)	A- (3.5-3.8)	B+ (3.2-3.4)	B (2.9-3.1)	B- (2.5-2.8)	C+ (2.2-2.4)	C (1.9-2.1)	C- (1.5-1.8)	D+ (1.2-1.4)	D (0.9-1.1)	D- (0.7-0.8)	E (0.0)	Pass	Credit	No Credit
25%	25%	17%	17%	8%		8%								

In regard to your academic program, is this course best described as:

**(N=12)**

In your major	A core/distribution requirement	An elective	In your minor	A program requirement	Other
75%				25%	

**STANDARD FORMATIVE ITEMS**

	N	Excellent (5)	Very Good (4)	Good (3)	Fair (2)	Poor (1)	Very Poor (0)	Median	DECILE RANK	
									Inst	College
Course organization was:	14	36%	29%	21%	14%			4.0	3	4
Clarity of instructor's voice was:	14	29%	29%	29%	14%			3.8	1	2
Explanations by instructor were:	14	36%	21%	14%	29%			3.8	2	3
Instructor's ability to present alternative explanations when needed was:	14	43%	7%	14%	36%			3.5	1	2
Instructor's use of examples and illustrations was:	14	43%	14%	21%	21%			4.0	2	3
Quality of questions or problems raised by the instructor was:	14	43%	7%	29%	21%			3.5	1	2
Student confidence in instructor's knowledge was:	14	57%	14%	14%	14%			4.6	4	5
Instructor's enthusiasm was:	14	43%	14%	21%	21%			4.0	2	2
Encouragement given students to express themselves was:	14	43%	14%	14%	21%	7%		4.0	2	3
Answers to student questions were:	14	50%	7%	14%	29%			4.5	5	6
Availability of extra help when needed was:	14	43%	29%	7%	21%			4.2	3	4
Use of class time was:	14	43%	7%	29%	21%			3.5	1	2
Instructor's interest in whether students learned was:	14	50%	7%	14%	21%	7%		4.5	4	5
Amount you learned in the course was:	14	50%	7%	7%	29%	7%		4.5	6	6
Relevance and usefulness of course content were:	14	43%	7%	21%	21%		7%	3.5	1	1
Evaluative and grading techniques (tests, papers, projects, etc.) were:	14	50%		21%	29%			4.0	3	4
Reasonableness of assigned work was:	14	36%	36%	7%	21%			4.1	3	4
Clarity of student responsibilities and requirements was:	14	43%	21%	14%	21%			4.2	3	4

### STANDARD OPEN-ENDED QUESTIONS

#### Was this class intellectually stimulating? Did it stretch your thinking? Why or why not?

1. Yes and yes. Everything was new to me and programming itself is conceptually difficult.
2. This class is intellectually stimulating where I have just been introduced to programming.
3. Yes. It allowed us to problem solve in our own way fulfilling the requirements needed.
4. Yes, i have to think about code and how to use them
5. Yes it was very interesting as it expanded my knowledge of coding and its applications
7. I learned a lot in this class. It was a very interesting and challenging course.
8. I made me think alot about how the code works
9. Very much. CS is fascinating and difficult, but also very rewarding.

#### What aspects of this class contributed most to your learning?

1. Professor Pisan made a HUGE difference. He made an obvious effort to make sure we understood and got through the difficult topics.
2. The homework or Zybooks help my learning the most.
3. Definitely working on problems in-class individually and then as a class really helped me understand concepts.
4. In class practice with the code, that was very nice to do and practice
5. Professor Pisan was amazing at giving alternatives when it was clear that some of the book content was not clear and very difficult to learn from.
6. The examples
7. The homework and classwork really helped with the understanding of the material.
8. Running through the code
9. All of it

#### What aspects of this class detracted from your learning?

1. None. Excellent class.
2. I wasn't able to finish writing down some of the most important codes since the professor moved on to a different code quickly. I needed time to write down the code for me to understand outside of class.
4. nothing
5. Overall I thought this class was very well done and felt that my time was well spent whether in classroom or doing assignments.
7. The zybooks wasn't as helpful in my opinion
9. None of it

#### What suggestions do you have for improving the class?

1. Nothing, same reason.
2. It would be great if the professor speaks slower for us to understand better and to wait for the students to finish writing the code before continuing on.
4. nothing everything was very well plan
5. If anything just deeper analysis of some of the more complex topics as the book may not fully explain how some aspects of coding works or very briefly brushes on it then moves on.
7. Have more opportunities with improving grades.
8. when going through code explain it
9. None

IASystem Course Summary Reports summarize student ratings of a particular course or combination of courses. They provide a rich perspective on student views by reporting responses in three ways: as frequency distributions, average ratings, and either comparative or adjusted ratings. Remember in interpreting results that it is important to keep in mind the number of students who evaluated the course relative to the total course enrollment as shown on the upper right-hand corner of the report.

**Frequency distributions.** The percentage of students who selected each response choice is displayed for each item. Percentages are based on the number of students who answered the respective item rather than the number of students who evaluated the course because individual item response is optional.

**Median ratings.** IASystem reports average ratings in the form of item medians. Although means are a more familiar type of average than medians, they are less accurate in summarizing student ratings. This is because ratings distributions tend to be strongly skewed. That is, most of the ratings are at the high end of the scale and trail off to the low end.

The median indicates the point on the rating scale at which half of the students selected higher ratings, and half selected lower. Medians are computed to one decimal place by interpolation.<sup>1</sup> In general, higher medians reflect more favorable ratings. To interpret median ratings, compare the value of each median to the respective response scale: *Very Poor, Poor, Fair, Good, Very Good, Excellent (0-5)*; *Never/None/Much Lower, About Half/Average, Always/Great/Much Higher (1-7)*; *Slight, Moderate, Considerable, Extensive (1-4)*.

**Comparative ratings.** IASystem provides a normative comparison for each item by reporting the decile rank of the item median. Decile ranks compare the median rating of a particular item to ratings of the same item over the previous two academic years in all classes at the institution and within the college, school, or division. Decile ranks are shown only for items with sufficient normative data.

Decile ranks range from 0 (lowest) to 9 (highest). For all items, higher medians yield higher decile ranks. The 0 decile rank indicates an item median in the lowest 10% of all scores. A decile rank of 1 indicates a median above the bottom 10% and below the top 80%. A decile rank of 9 indicates a median in the top 10% of all scores. Because average ratings tend to be high, a rating of "good" or "average" may have a low decile rank.

**Adjusted ratings.** Research has shown that student ratings may be somewhat influenced by factors such as class size, expected grade, and reason for enrollment. To correct for this, IASystem reports **adjusted medians** for summative items (items #1-4 and their combined global rating) based on regression analyses of ratings over the previous two academic years in all classes at the respective institution. If large classes at the institution tend to be rated lower than small classes, for example, the adjusted medians for large classes will be slightly higher than their unadjusted medians.

When adjusted ratings are displayed for summative items, **relative rank** is displayed for the more specific (formative) items. Rankings serve as a guide in directing instructional improvement efforts. The top ranked items (1, 2, 3, etc.) represent areas that are going well from a student perspective; whereas the bottom ranked items (18, 17, 16, etc.) represent areas in which the instructor may want to make changes. Relative ranks are computed by first standardizing each item (subtracting the overall institutional average from the item rating for the particular course, then dividing by the standard deviation of the ratings across all courses) and then ranking those standardized scores.

**Challenge and Engagement Index (CEI).** Several IASystem items ask students how academically challenging they found the course to be. IASystem calculates the average of these items and reports them as a single index. *The Challenge and Engagement Index (CEI)* correlates only modestly with the global rating (median of items 1-4).

**Optional Items.** Student responses to instructor-supplied items are summarized at the end of the evaluation report. Median responses should be interpreted in light of the specific item text and response scale used (response values 1-6 on paper evaluation forms).

<sup>1</sup> For the specific method, see, for example, Guilford, J.P. (1965). *Fundamental statistics in psychology and education*. New York: McGraw-Hill Book Company, pp. 49-53.
