OPEN-ENDED QUESTIONS

What is helping you to learn in this course?

- 2. Exercises and assignments help with learning course content
- 3. Hands on activities

What is hindering your learning in this course?

- 2. There could be more exercises on topics like alpha-beta pruning to double-check if we are learning the content. For every topic, I would only say I know it if I can output information on it (either through exercises or assignments).
- 3. Remote setting
- 4. I have zero motivation for most things at the moment, not really the instructors fault.

What can your instructor do to improve your learning in this course?

- 1. I feel like the class is a bit disorganized. Especially when we are learning new materials in the first half of the class but taking quiz for the second half of the class. I would much prefer spending 10 mins to review then take the quiz in the first half of the class. And focus on new materials in the second half of the class. This way we can process new materials later instead of quickly shift our attention to other materials while we are still absorbing new materials.
- 2. I don't know if it's a limitation for canvas, but posting that quizzes will be due a week early is useful. Although, I understand if that is not possible since you only want to release quizzes when people can actually do them.
- 3. Go over exam topics

What is the course song? Have you been practicing it?

- 2. Panic at the disco. Only a little during when its played
- 3. High hopes, yes
