**Open questions:**

10. What did you like particularly in this subject?	3	Open question	42.86
---	---	---------------	-------

- 10.1 It is nicely conducted. The teacher shows us what we should learn on the screen.
- 10.2 Clear and creatvie teaching, good handout notes.
- 10.3 The tutor (Steven Gilandas) was extremely helpful with questions after the class and often stayed back up to 30-40 minutes helping students with their 3d technical problems.

11. Please suggest any improvements that could be made to this subject.	3	Open question	42.86
---	---	---------------	-------

- 11.1 Lack of good material is an issue here. Yes the teacher handed out some papers every week about certain topics but they all focus on doing individual functions rather than teaching specific area. I'd suggest that instead of doing a small project every week, we cover the subject by the menu. In another word, every week we learn about certain menu(s) in Maya instead of doing small animation projects weekly which we end up repeated stuff.
- 11.2 I think it would be nice if the undergrads (IT) and postgrads (DAB) were seperated in each class, not only will it be easier to mark (i.e have different bench marks for students from different faculties) but easier to teach, as students from IT will have similar faculties.  
  
It will also be good if the steps used in Maya through the lesson was desktop video captured to ensure students can also watch them later on, as sometimes it became hard to follow in class.
- 11.3 The classes could be alot smaller.
