Open questions:

13.	What did you like particularly in this subject?	5	Open question	41.67
-----	---	---	---------------	-------

- 13.1 Both teachers knew the topic well and had clear experience working in the industry.
- 13.2 The quality of the teacher was astounding, and the feedback delivered by the teacher as well as HOW to go about implementing the improvements was genius.
- 13.3 It was an interesting subject to begin with, however the style of teaching ruined it for me.
- 13.4 Almost everything, the teachers were great.
- 13.5 A lot of feedback was given in every lesson

14.	Please suggest any improvements that could be made to this subject.	7	Open question	58.33
-----	---	---	---------------	-------

- 14.1 Please have accurate assessment guidelines ready when the semester begins. Many students, including myself, were confused by the conflicts between what the teacher mentioned in class and what was specified in the documents on UTSONline. This was especially relevant in assessment 3, where it was hard to tell what components were being assessed and what weighting they had.
- 14.2 Should decrease the number of students in each classes, since there's only 2 teachers for around 50 students, 3 hours is just not enough time for the teachers to answer questions and/or give feedbacks to every students
- 14.3 The assignment outlines are out of date and thus confusing. Might want to update them.
- 14.4 Update the subject outline and assessment documents to prevent confusion please!
- 14.5 My only improvement would be maybe to have a preset of models ready for the major assessment so it is more concentrated on animation and less time is soaked from creating models.
- 14.6 Robert tended to rush the work in the lectures. He wouldn't even look back to see if students are following him or not, and just kept going ahead. A lot of students had done 3D animation before, so they were fine, but I do know of some students that this is the first time doing any form of 3D animation, including myself, and we were all struggling to understand the concepts and the software that was being used. Also a lot of the times Rob would use terms that we have never heard of, and wouldn't even explain it to us later. I think the main reason for this is having too big of a class. Maybe if they broke the 2 classes into 4, then each student can get more time and help from the teachers.

Scale	SD - strongly disagree	D - disagree	N - neutral	A - agree	SA - strongly agree

14.7 Could be more organization with regards to updating the assessment sheets. For example one listed hard copes required but were told to only submit online.
